RONILO J. JINON JR.

QA Engineer

Davao City, Philippines | +63 952 390 0732 | ronilo29.career@gmail.com

PROFESSIONAL SUMMARY

QA Engineer with 6+ years of experience ensuring the quality and reliability of web and mobile applications, including a high-volume fintech platform. Skilled in manual testing, test planning, test case design, defect management, and API validation. Works effectively in Agile Scrum teams alongside developers, product owners, and business stakeholders to deliver stable, high-quality releases. Currently expanding test automation skills with Playwright.

CORE SKILLS

Testing: Functional, Regression, Smoke, User Acceptance (UAT), Exploratory, Cross-Browser, Cross-Device, Production Validation

QA Practice: Test Planning, Test Case Design, Requirements Analysis, Defect Management, Defect Triage, Test Documentation

Automation & API: Playwright (E2E, Web UI, Regression), Postman (API, Integration Testing), SQL (Data Validation)

Tools: Jira, Git, GitHub, BrowserStack, Figma, Google Workspace

Methodology: Agile Scrum, Sprint Planning, Daily Stand-ups, Sprint Reviews, Retrospectives

PROFESSIONAL EXPERIENCE

QA Engineer
Mar 2022 – Jun 2025

Yondu · Client: GCash by Mynt

- Analyzed business requirements and user stories to define test scenarios and acceptance criteria.
- Created and maintained detailed test cases, checklists, and test documentation.
- Executed functional, regression, smoke, and user acceptance testing ahead of production releases.
- Validated API requests and responses using Postman to confirm data accuracy and expected behavior.
- Supported releases through production validation and post-deployment verification.
- Participated in Sprint Planning, Daily Stand-ups, Sprint Reviews, and Retrospectives within Agile Scrum teams.
- Identified testing gaps and recommended practical QA process improvements.

QA Engineer
Jan 2021 – Mar 2022

Yondu · Client: Konsi Jempolan by FMC

- Performed exploratory testing to uncover unexpected behaviors and defects outside predefined test cases.
- Tracked testing progress and reported results, open defects, risks, and release readiness to stakeholders.
- Reviewed existing test cases and processes to remove redundant or outdated tests and close coverage gaps.
- Supported basic test automation using Playwright to automate repetitive web application test scenarios.
- Documented testing procedures, common defects, lessons learned, and best practices to support team knowledge sharing.

QA Engineer
Dec 2018 – Jan 2021

Solo by Foodics

- Designed positive, negative, boundary, and data-driven test scenarios to strengthen test coverage.
- Performed cross-browser and cross-device testing to ensure a consistent user experience.
- Validated UI elements, business logic, data integrity, and system behavior against approved requirements.
- Reproduced reported defects, analyzed logs and API responses, and provided detailed findings to developers.
- Participated in defect triage meetings to assess severity, priority, impact, and resolution timelines.

KEY ACHIEVEMENTS

- Supported multiple production releases for one of the Philippines' largest fintech platforms.
- Improved defect detection during testing phases through thorough requirements analysis and broader test coverage.
- Contributed to QA initiatives that reduced production defects and improved user experience.

EDUCATION

Bachelor of Science in Computer Engineering

STI College of Davao
